

NexaAI Technologies Pvt. Ltd.

Company Profile & Product Documentation

Confidential — Internal Reference Document | Version 3.2 | July 2025

About NexaAI Technologies

NexaAI Technologies Pvt. Ltd. is a Pune-based artificial intelligence startup founded in 2021, specializing in enterprise-grade AI solutions, large language model (LLM) applications, and intelligent document automation. With a team of 85 engineers, researchers, and business professionals, NexaAI serves clients across the BFSI, healthcare, legal, and e-commerce sectors in India, Southeast Asia, and the Middle East.

Our mission is to democratize AI by delivering production-ready, cost-effective, and privacy-first AI solutions that solve real business problems. NexaAI holds 6 patents in AI-based document processing and was recognized as one of India's Top 25 AI Startups by NASSCOM in 2024.

Key Facts

Founded	March 2021
Headquarters	Kharadi, Pune, Maharashtra, India
Offices	Mumbai Bengaluru Dubai (UAE)
Employees	85 (as of July 2025)
CEO & Co-Founder	Arjun Mehta
CTO & Co-Founder	Priya Nair
Revenue (FY 2024-25)	INR 18.4 Crore
Funding	Series A — USD 4.2 Million (2023)
Investors	Accel India Blume Ventures AngelList India
Website	www.nexaai.in

Products & Services

1. NexaDoc — Intelligent Document Processing Platform

NexaDoc is our flagship product — an AI-powered document intelligence platform that automates extraction, classification, and validation of information from unstructured documents including KYC documents, invoices, contracts, and medical records.

Core Capabilities:

- OCR-based text extraction using PaddleOCR and custom-trained Tesseract models
- Support for Aadhaar Card, PAN Card, Passport, Driving Licence, and Voter ID
- Regex-based structured field extraction (Name, DOB, Address, ID Number)
- Image preprocessing pipeline using OpenCV for skew correction and noise removal
- REST API built with FastAPI for seamless integration with client systems
- SSH/SFTP integration via Paramiko for secure remote document processing
- Supports batch processing of up to 10,000 documents per hour

Pricing: Starting at INR 2,499/month (up to 5,000 document scans)

2. NexaChat — Enterprise RAG Chatbot Platform

NexaChat is a retrieval-augmented generation (RAG) chatbot platform that enables enterprises to deploy AI assistants trained on their own internal documents, policies, and knowledge bases — without sending sensitive data to third-party LLM providers.

Core Capabilities:

- Document ingestion pipeline: PDF, DOCX, Excel, and web scraping support
- Vector database integration: FAISS, ChromaDB, and Pinecone
- Embedding models: HuggingFace Sentence Transformers (all-MiniLM-L6-v2, BGE-M3)
- LLM support: OpenAI GPT-4, Anthropic Claude, Google Gemini, Llama 3 (local)
- LangChain and LlamaIndex orchestration for multi-step RAG pipelines
- Conversation history management with memory buffers
- Role-based access control and audit logging
- On-premise deployment option for data-sensitive industries

Pricing: INR 8,999/month (up to 3 bots, 50,000 queries)

3. NexaInsights — AI-Powered Analytics Dashboard

NexaInsights transforms raw business data into actionable intelligence using machine learning models and natural language query interfaces. Users can ask questions in plain English and receive

instant charts, summaries, and forecasts.

- Natural Language to SQL query engine powered by fine-tuned LLMs
- Integration with MySQL, PostgreSQL, MongoDB, and Google BigQuery
- Automated report generation with Power BI and custom HTML dashboards
- Anomaly detection using Isolation Forest and LSTM-based time-series models
- Predictive analytics using Scikit-Learn (Random Forest, XGBoost)

Technology Stack

NexaAI's engineering team builds on a modern, cloud-native AI/ML stack designed for scalability, reproducibility, and production reliability.

AI / ML Frameworks

- Python 3.11 — primary language for all AI/ML development
- PyTorch 2.x — deep learning model training and fine-tuning
- Hugging Face Transformers — pre-trained LLMs and embedding models
- Scikit-Learn — classical ML algorithms (classification, regression, clustering)
- LangChain & LangGraph — LLM orchestration, agents, and RAG pipelines
- LlamaIndex — document indexing and retrieval for RAG applications

Data Processing & Databases

- Pandas & NumPy — data manipulation and numerical computing
- Apache Airflow — data pipeline orchestration
- MySQL & PostgreSQL — relational databases
- MongoDB — NoSQL document storage
- FAISS & ChromaDB — vector databases for similarity search
- Redis — caching layer for API responses

Backend & APIs

- FastAPI — high-performance REST API development
- Docker & Kubernetes — containerization and orchestration
- Nginx — reverse proxy and load balancing
- Celery + Redis — distributed task queue for async processing
- Paramiko — SSH/SFTP for secure remote file operations

Cloud & MLOps

- AWS (EC2, S3, Lambda, SageMaker) — primary cloud infrastructure
- MLflow — experiment tracking and model registry
- Weights & Biases — model training monitoring
- GitHub Actions — CI/CD pipelines
- Linux (Ubuntu 22.04) — production server environment

Leadership Team

Arjun Mehta

CEO & Co-Founder

IIT Bombay alumnus with 12 years of experience in enterprise software and AI product management. Previously Director of Engineering at Infosys AI Labs. Arjun leads NexaAI's product vision, investor relations, and strategic partnerships.

Priya Nair

CTO & Co-Founder

PhD in Machine Learning from IISc Bengaluru. Expert in NLP, transformer architectures, and MLOps. Previously led the AI Research team at Flipkart. Priya oversees all R&D, engineering hiring, and technical architecture decisions.

Rahul Deshmukh

VP of Engineering

8 years of experience building distributed systems at scale. Ex-Razorpay backend architect. Leads NexaAI's platform engineering, DevOps, and infrastructure teams.

Sneha Kulkarni

Head of Data Science

MS in Data Science from University of Edinburgh. Specialized in computer vision and document AI. Manages the data science team responsible for model training and deployment.

Vikram Shah

VP of Sales & Partnerships

15 years in B2B SaaS sales across BFSI and healthcare verticals. Built NexaAI's client portfolio from 0 to 42 enterprise clients within 3 years.

Company Culture & Values

Build with Purpose: Every product we ship solves a real problem for a real user.

Privacy First: We design AI systems that respect user data and comply with DPDP Act 2023.

Move Fast, Stay Responsible: We ship quickly but never compromise on safety, fairness, or accuracy.

Continuous Learning: We invest in our team through learning budgets, research time, and conference sponsorships.

Radical Transparency: We share performance metrics, financials, and roadmaps openly with the entire team.

Clients & Case Studies

NexaAI serves 42 enterprise clients across 6 industries. Below are selected case studies demonstrating the business impact of our AI solutions.

Case Study 1: KYC Automation for Axis Cooperative Bank

Industry: BFSI | NexaDoc

- Challenge: Manual KYC verification taking 3-5 days per customer, high error rates.
- Solution: Deployed NexaDoc to automate Aadhaar, PAN, and Passport verification.
- Results: KYC processing time reduced from 3 days to 4 minutes (99.6% reduction).
- Accuracy: 97.3% field extraction accuracy on 1.2 million documents processed.
- ROI: Saved INR 2.1 Crore annually in manual verification costs.

Case Study 2: Internal Knowledge Bot for Infosys BPM

Industry: IT Services | NexaChat

- Challenge: 8,000 employees struggling to find policy and process information.
- Solution: NexaChat bot trained on 3,200 internal documents (SOPs, HR policies, manuals).
- Results: 78% reduction in HR helpdesk tickets within 60 days of deployment.
- Usage: 4,200 unique queries per day, 91% user satisfaction score.
- Privacy: Fully on-premise deployment — no data leaves client infrastructure.

Case Study 3: Predictive Analytics for MedPlus Health

Industry: Healthcare | NexaInsights

- Challenge: Inability to forecast medicine demand across 500+ retail outlets.
- Solution: NexaInsights deployed with LSTM time-series models for demand forecasting.
- Results: Stockout incidents reduced by 43%, overstock reduced by 31%.
- Savings: INR 80 lakh saved in inventory carrying costs in first year.
- Integration: Connected to existing SAP ERP system via REST API.

Pricing Plans

Plan	NexaDoc	NexaChat	NexaInsights
Starter	INR 2,499/mo 5,000 docs	INR 4,999/mo 1 bot, 20K queries	INR 3,499/mo 2 users
Growth	INR 7,999/mo 25,000 docs	INR 8,999/mo 3 bots, 50K queries	INR 9,999/mo 10 users
Enterprise	Custom pricing Unlimited docs	Custom pricing Unlimited bots	Custom pricing Unlimited users

Support & SLA

NexaAI provides tiered customer support with the following service level agreements:

Support Tier	Response Time	Availability	Channels
Starter	24 hours	Mon-Fri 9AM-6PM	Email
Growth	4 hours	Mon-Sat 8AM-8PM	Email + Chat
Enterprise	30 minutes	24/7/365	Email + Chat + Phone + Dedicated CSM
